

Creating PostScript files from MAC InDesign CS

You will first need to download the **"Prinery Refiner.ppd"** available thru your sales / customer service representative. Uncompress the file and place into your OS 9 System Folder / Extension Folder / Printer Description Folder. Use the following screen captures as your guide to creating a PostScript file prior to Distilling with Acrobat.

1. Select **Print** from the File Menu. The following dialog box will appear:

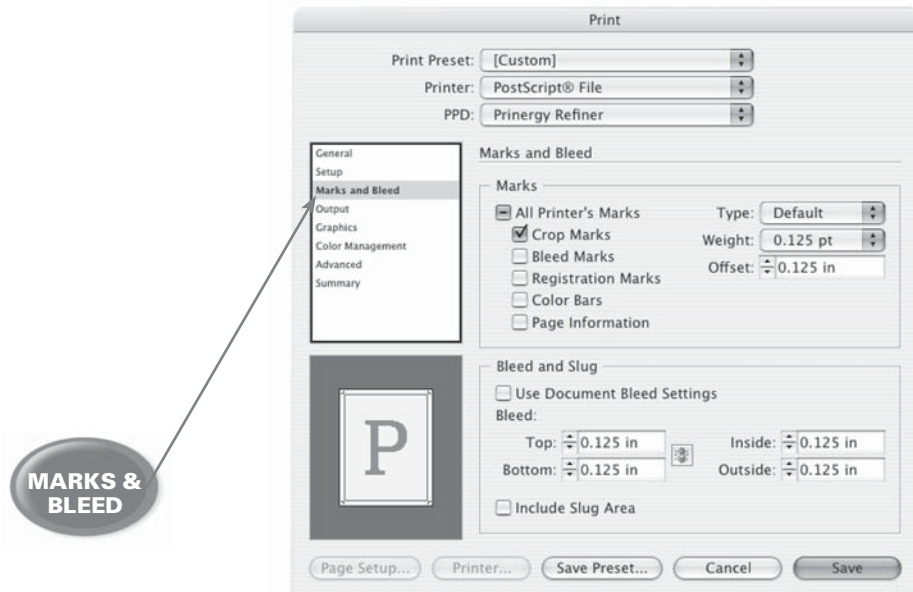

2. Match the settings as shown above, then select **Setup** to continue.

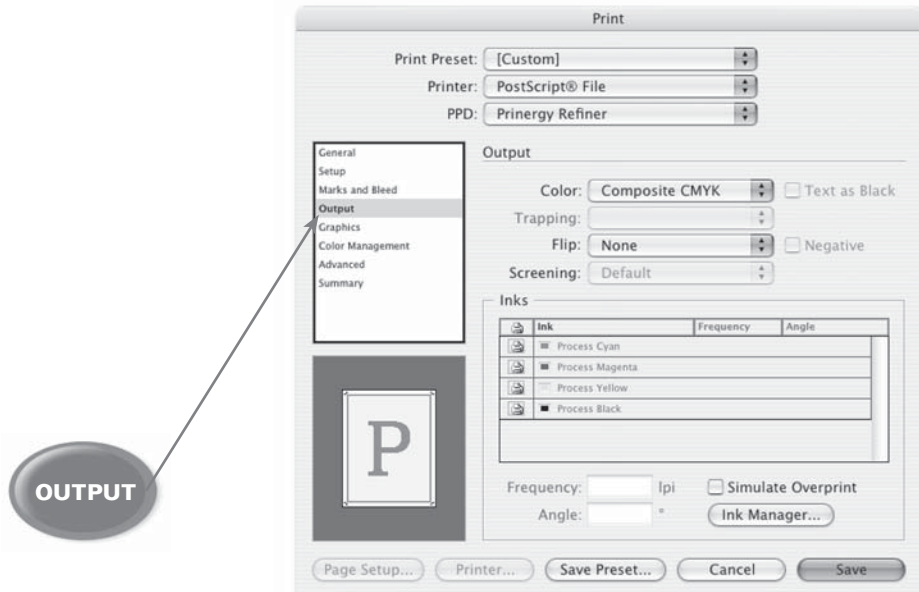

3. Under paper size select **Custom**. Adjust width and height to measure 1" larger than your actual document size (the example shown is for an 8.5" x 11" page). Match the other settings as shown.

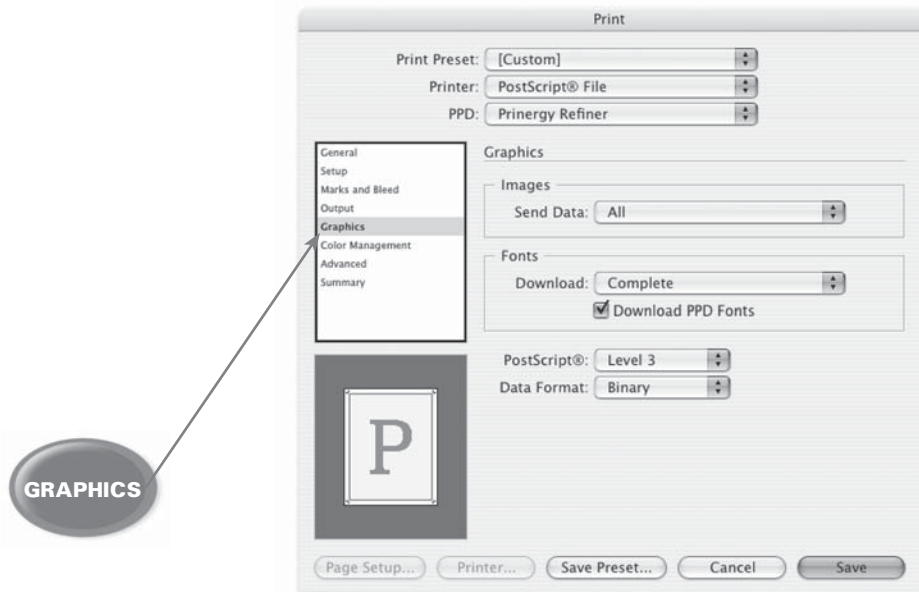

4. Select **Marks & Bleed** to continue. Match the settings as shown below.

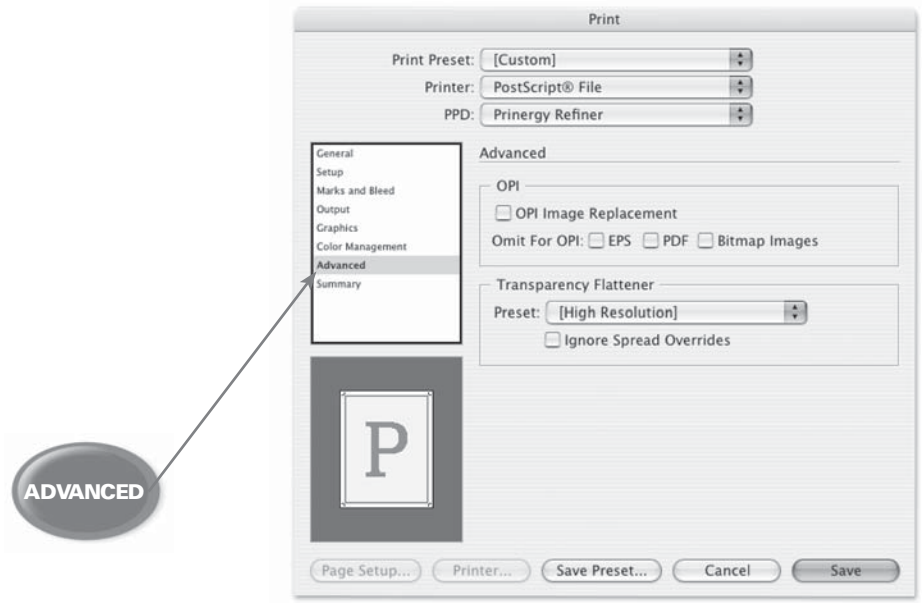

5. Select **Output** to continue. Match the settings as shown below.

6. Select **Graphics** to continue. Match the settings as shown below.

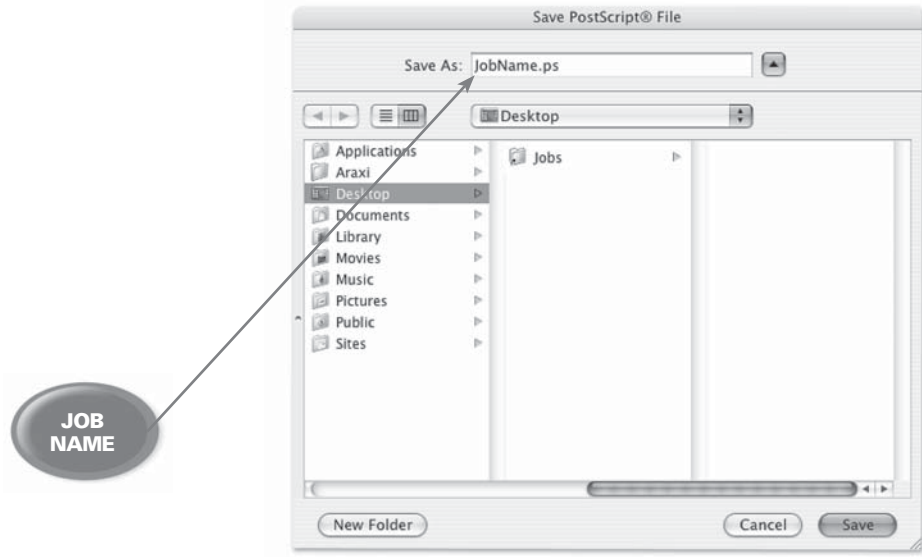

7. Select **Advanced** to continue. Match the settings as shown below.

8. Select the **Save** button.

9. Name the file with the “.ps” file extension. Avoid using spaces, special characters, forward slashes or hyphens.

10. Select the **Save** button to save your PostScript file.

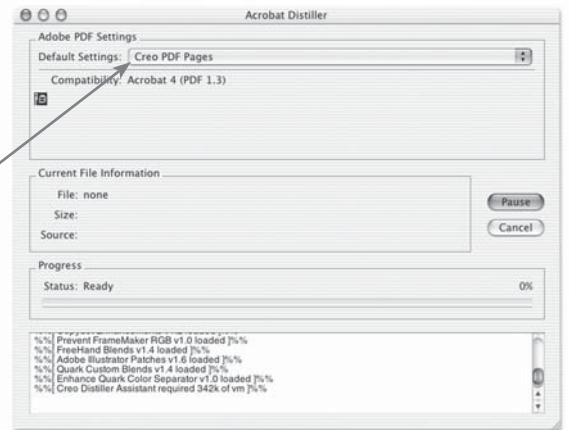

Distilling PDF files from PostScript files

Copy the file **“CreoDistillerAssistant”** into your OS X Users / Shared / Adobe PDF 6.0 / Startup folder. **Note:** Delete any file named “Example.ps” from the Startup Folder. This file can interfere with the proper operation of the Creo Distiller Assistant.

Copy the file **“Creo PDF Pages.joboptions”** into your OS X Users / Shared / Adobe PDF 6.0 / Settings folder.

Restart Acrobat Distiller. **Note:** This software is compatible with Adobe Acrobat 4.0 (or newer) for Macintosh.

1. Drag and drop the PostScript file onto the Acrobat Distiller window with **“Creo PDF Pages”** selected under the Adobe PDF/ Default Settings drop down window.

2. After the file has been distilled, you should have a PDF file with the same name in the same location as your PostScript file.

3. Please take a moment to open and view the file. The file should include **trim marks**, **bleeds**, all **images** and **fonts**, and look as you intended.

If you have any further questions or concerns, please feel free to contact your customer service or sales representative at 503-588-9339.
