

3. Choose **Prinergy Refiner** from the drop down list of printers.

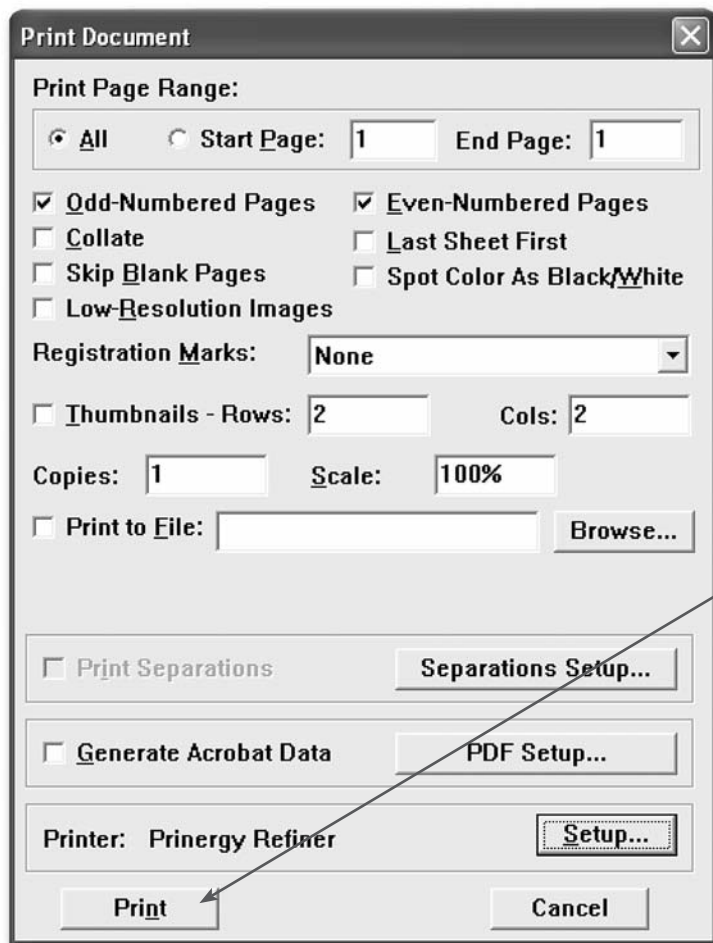

4. Under Paper Size, choose either **Letter** or **Tabloid** depending upon actual size of document. A minimum of 1" larger than your actual document size is preferred. Match the other settings as shown.

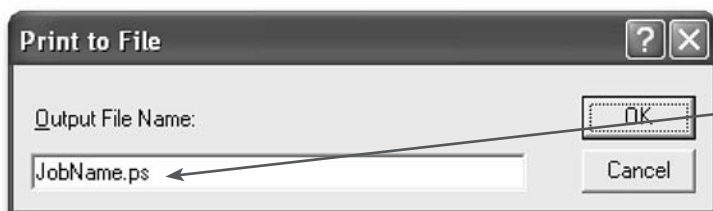

5. Select the  button to continue.

6. Select the **Print** button to continue.

7. Name the file with the “.ps” extension. Avoid using spaces, special characters, forward slashes or hyphens.

8. Select the **OK** button to save your PostScript file. Your PostScript file will be saved into the same folder as your original FrameMaker document.

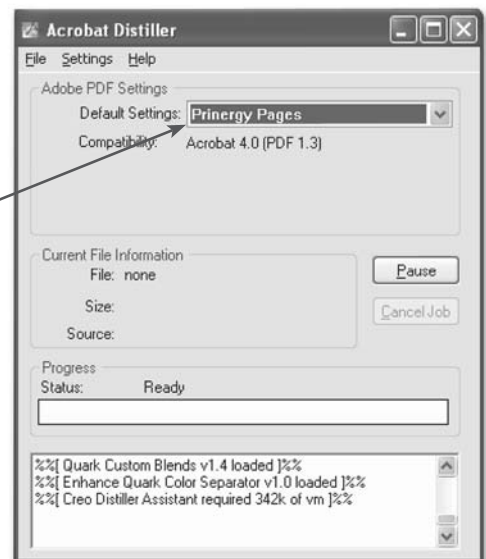

# Distilling PDF files from PostScript files

Copy the file **“CreoDistillerAssistant”** into your Documents and Settings / All Users / Documents / Adobe PDF 6.0 / Startup folder. **Note:** Delete any file named Example.ps from the Startup folder. This file can interfere with the proper operation of the Creo Distiller Assistant.

Copy the file **“Creo PDF Pages.joboptions”** into your Documents and Settings / All Users / Documents / Adobe PDF 6.0 / Settings Folder.

Restart Acrobat Distiller. **Note:** This software is compatible with Adobe Acrobat 4.0 (or newer) for Windows.

1. Drag and drop the PostScript file onto the Acrobat Distiller window with **“Prinerger Pages”** selected under the Adobe PDF/Default Settings drop down window.

2. After the file has been distilled, you should have a PDF file with the same name in the same location as your PostScript file.

3. Please take a moment to open and view the file. The file should include **trim marks**, **bleeds**, all **images** and **fonts**, and look as you intended.

If you have any further questions or concerns, please feel free to contact your customer service or sales representative at 503-588-9339.
